

INDEPENDENCE

Simply the fastest and most powerful Sampler, Virtual Instrument, Workstation, ... INDEPENDENCE is the ultimate and innovative "Sonic Workstation" for sample libraries and closes the gap between Virtual Instruments and Samplers. From both these systems only the advantages were combined to an intuitively operatable software solution. Furthermore this powerful tool was extended with many professional and innovative features for highest musical demands and creativity.

INDEPENDENCE: Overview

With yellow tools **Independence** you will be able to use, edit, customize and manipulate your instruments in a single familiar environment. Any instrument specific settings can also get assigned to all other loaded instruments and any kind of customization is now possible as everything is available in the same software.

With yellow tools's A.I.T. (Advanced Instrument Technology) you are entering by far the fastest, most powerful and easiest way of performing, customizing and creating pristine instruments on your computer. The product concept and all innovative components of **Independence** were developed by yellow tools audio- and software engineers since 2001. The results are more than impressive and make **Independence** unique right from the beginning.

You have access to hundreds of totally customized, music related features and an absolutely unmatched performance. The intuitive user interface, the unique file management, an ultra fast streaming integration and the Auto-RAM-Cleaner allow you to load unlimited instruments in seconds.

Independence comes with a vast 18 GB sound library which contains a "best-of" collection

from awardwinning instruments from yellow tools products and also totally new content. With **Independence** we developed an amazing base for our premium sound libraries and offer only finest and best quality samples for the professional use of sample based instruments.

Of course **Independence** is fully compatible to the yellow tools Modular Virtual Instruments Candy, Culture and Majestic and we will also expand **Independence** continuously with more and more unique and fascinating sound libraries.

Additionally you can import WAV and AIFF files (up to 32bit/192kHz) and the amazing Auto-Mapping Import feature lets you create your custom mappings in just a few seconds.

Let Independence inspire you and experience how your musical ideas come true!
